SECTION- 2

DETAILS OF EXPRESSION OF INTEREST (EoI)

2.1. ABOUT MDL

Mazagon Dock Shipbuilders Limited (MDL) is a leading submarine and shipbuilding company in the country with a Navratna Status. The company was taken over by the Government of India and established as a Public Sector Undertaking under the Ministry of Defence in 1960. Over the last six decades, MDL has delivered over 250 warships/submarines/ platforms to various customers in India and abroad. Out of these 30 major warships/submarines have been delivered to the Indian Navy. The diversified platforms delivered to various customers range from Destroyers, Stealth Frigates, Submarines, Missile Boats, Corvettes, Offshore Patrol Vessels, Multipurpose Support Vessels, Offshore Supply Vessels, Dredgers, Tugs and Cargo-Cum-Passenger Vessels.

2.2. AIM

Design, development and supply of Prototype of Alternator with Rectifier for P75-India project. The handshaking between supplier of Alternator and Diesel engine is mandatory and overall integration & trial responsibility lies with MDL nominated Diesel Engine supplier and alternator supplier for their respective supplied equipment.

2.2.1 SCOPE OF THE PROJECT

- i. MDL is seeking Offer from Indian companies / consortiums led by Indian companies, duly registered, (under Indian Companies Act-2013), willing for Indigenisation and Business development through collaboration for indigenised Alternator with Rectifier for usage on Submarine along with MDL, under Make-I program (Max investment by MDL upto 70% & Min investment by firm is 30%) with joint IP sharing. The participating firm must possess necessary knowledge of the field of alternator/generator.
- ii. The technology if any possessed by participating firm must be non-infringing while delivering the desired performance and it must be clear from third-party IP infringement claims.
- iii. The participating firm must show willingness on its letter head to achieve more than 50% local content in above mentioned projects in line with GoI policies amended from time to time.
- iv. Interested companies meeting the Pre-Qualification Requirements (PQR) as given in Section-4 and ready to associate with MDL as per broad scope/ expectations given above are invited to submit their offer in Offer to this EoI /RFI.

- v. Design and development of the Alternator with Rectifier along with auxiliary systems like cooling of alternator, emergency backup supply etc.
- vi. Type testing of prototype as per Naval MIL standards.
- vii. Factory Acceptance trials (FAT) for Alternator with Rectifier.
- viii. The firm has to perform the land-based Test and Trials.

2.2.2 TECHNICAL REQUIREMENTS

The diesel alternator rectifier (DAR) is primarily used to convert the mechanical energy produced by the diesel engine in to usable DC electrical power. Diesel engine drives alternator, which generate 3 phase AC power. The rectifier converts 3 -phase AC power to DC power which used to recharge the submarine batteries. It can provide DC power to appropriate electrical systems. It also provides protection against Overload, over voltage, short circuit and excessive temperature etc.

It has following features.

- a. Maximum continuous output voltage 700-800V DC
- b. Rectifier – 3 Phase full wave Bridge rectifier
- c. Nominal power (rectified) 1400 KW
- d. The efficiency of the generator shall be $\geq 95\%$ at 100 % load.
- e. The alternator shall be a two bearing anti-friction type, with greasing device.
- f. The alternator shall be a synchronous machine with inner pole design which is being self-excited via a built-in exciter machine. There should be redundancy in stator winding and AVR.
- g. Alternator should have provision for parallel operation with load sharing
- h. This alternator can be operated and control through local DAR control panel as well as from remotely through IPMS (integrated platform management system) panel.
- i. The seawater cooler, the regulator and the rectifier unit shall be located in a steel profile frame, tightly screwed to the generator. Generator windings shall withstand a temporary sea water flooding in case of cooler leakage. After rinsing with fresh water and drying, the generator shall be ready for operation again.
- j. A terminal box for external data cables shall be installed at the Generator. It should have IP protection IP55 for cable plug and terminal box.
- k. IP protection for alternator – IP44
- l. Alternator with UPS for emergency back-up supply.
- m. Alternator cooling by fresh water loop this fresh water will further have cooled by sea water cooling heat exchanger system. The generators shall have straight-through ventilation in a closed cooling circuit with built-in impeller and top-mounted single-tube seawater cooler.
- n. The alternator shall be equipped with an anti-condensation heating.
- o. EMI EMC complied by MIL-STD-461G and JSS-55555
- p. Cathodic protection and coatings to prevent corrosion.
- q. Noise vibration standards - MIL STD 167-1, MIL-STD-740-1 & 2
- r. Shock standard - Indian navy shock grade A

2.2.3 GENERAL REQUIREMENTS

- i. The DAR must be manufactured in India and Technology used for their production shall not be sourced from a country which shares a land border with India under GFR Rule 144 (xi) on the grounds of Defence of India and National Security for information and compliance. Firm shall submit a Compliance Certificate w.r.t. Land Border Clause as per Annexure -4.
- ii. Land based test facilities (LBTF) is required to be arranged by the firm for prototype testing.
- iii. Actual production series will start after successful completion of prototype (Prototype capacity will be mutually decided during tendering process)
- iv. Design, development, manufacturing and supply of actual prototype of Alternator with Rectifier are to be supplied within 18 months for 1 set from the date of development order, including the prototype type testing.
- v. On successful development of prototype of Alternator with Rectifier, Vendor shall have the capability to supply production variant Alternator with Rectifier of quantity 3 sets for Submarine -1 for integration with Diesel Engine (to the nominated Vendor) within 12 months from the date of production order and for subsequent Submarines - 2 to 6 (3 sets for each Submarine) delivery shall be staggered at 12 months interval.
- vi. Firm shall submit a technical proposal detailing its technology validation process, covering the transition from prototype development to actual production on the platform
- vii. Firm shall submit a detailed design, development and supply plan including project timelines
- viii. Firm shall submit the risk mitigation plan for the overall end to end product for design, development and supply of Prototype.
- ix. Firm to propose the suitable firefighting system for DAR.

Note: Additional Technical details in terms of Compliance Matrix will be shared against NDA to the interested vendors.

2.3. SEALING AND MARKING OF OFFERS:

The Firms shall submit their offers by e-mail or registered post or courier or by hand at the following office address on or before the last date and time for receipt of offers as mentioned in the EoI documents.
