TECHNICAL REQUIREMENTS FOR WATER TIGHT VENTILATION VALVES

1. **SCOPE.** The statement of requirements covers design, manufacturing, testing and commissioning of valves on board.

2. **Technical Requirements of Water Tight Butterfly Valves.** These valves are fitted on ventilation trunks on board ships. The details are as follow

   (a) Butterfly Valves are used for positive isolation of watertight zones.
   (b) The valves are used for maintaining gas & watertight integrity of ships.
   (c) The valves are fitted on ventilation trunks piercing the decks of ship.
   (d) The Butterfly valves are of wafer type.
   (e) All valves are to be vibration & shock proof.
   (f) All Cv & Torque values are to be provided

3. **Valve Construction.**

   (a) The valves are to be designed as per NES 375.
   (b) All valves are to be capable of withstanding shock NSS Grade “II”.
   (c) The Material, Constructional & Testing requirement of valves shall conform to the Codes / Standards specified in the valve data sheet.
   (d) Stops shall be provided to ensure positive alignment of the valves with the ports.
   (e) All valves are to be designed in such a way that the pressure drop across the valves is minimum.
   (f) Valve OPEN & CLOSED indicator shall be provided.
   (g) All valves shall be field serviceable.
   (h) All Raw material used for manufacturing of valves shall be new clean & free from rust, pits defects.
   (i) All valves are to be designed to offer minimum resistance to flow when in open position. Care is to be taken to avoid complications in casting, deep webbing or sudden change in section.
   (j) **Noise Requirement.** The measurement & acceptance criteria is to be as per type 2 of the “MIL-STD-740-2”.

4. **Ventilation Valves Actuation**

   (a) Lever operated up to & including 200 mm size.
   (b) Integral gearboxes with a range of gear ratios from 8:1 for 250mm up to & 16:1 for 500 mm size.
   (c) Some valves are also required to be electric motor operated.

### 1.4 Operating Temperature

- -10 °C to 85 °C

### 1.5 Valve Ref. Doc.

| NES 375 |

## Material Specification

### 2.1 Body

- **Material**: Aluminium Alloy
- **Specification**: BS 1490 – LM6, LM25 TF/NES 360

### 2.2 Disc

- **Material**: Aluminium Alloy
- **Specification**: BS 1490 – LM6, LM25 TF/NES 360

### 2.3 Shaft

- **Material**: Aluminium Alloy
- **Specification**: BS 970 431 S 29 OR 302 S 25/NES 360

### 2.4 Clamp Ring

- **Material**: Aluminium Alloy
- **Specification**: BS 1490 – LM6, LM25 TF/NES 360

### 2.5 Metal Seat

- **Material**: Aluminium Alloy
- **Specification**: BS 1490 – LM6, LM25 TF/NES 360

### 2.6 Soft Seat

- **Material**: PTFE

### 2.7 Disc Pin

- **Material**: Stainless Steel
- **Specification**: AISI 316

### 2.8 Spring

- **Material**: Stainless Steel
- **Specification**: AISI 316

### 2.9 Body Gasket

- **Material**: Asbestos Free
- **Specification**: BS 7531

### 2.10 Bearing

- **Material**: Phosphore Bronze
- **Specification**: BS 2874 PB-102

### 2.11 Seal

- **Material**: PTFE

### 2.12 Bolt

- **Material**: Alloy Steel
- **Specification**: BS 3692 GR 8.8 Duly Galvanized

### 2.13 Nut

- **Material**: Alloy Steel
- **Specification**: BS 3692 GR 8.8 Duly Galvanized

### 2.14 Handle

- **Material**: Forged Steel (Galvanized)
- **Specification**: BS 970

## Statutory Requirements

### 3.1 Painting/Surface Treatment

- **Specification**: Smooth Surface

### 3.2 Testing Hydrostatic

- **Specification**: As per BS 6755 Part I

### 3.3 Hydrostatic Test Pressure

- **Body**: 2 Bar
- **Seat**: 1.5 Bar

### 3.4 Noise Test

- **Specification**: MIL –STD-740-2

### 3.5 Inspection

- **Specification**: DQA/Third Party (IACS)
